THE QUAID'S MESSAGE TO STUDENTS

I am not making any particular reference to you but now that I have had the opportunity of talking to you, I must warn you not to allow your actions to be guided by ill-digested information or slogans and catch-words. Do not take them to heart or repeat them parrot-like. Take advantage of your period of training that this institution offers you by equipping yourself to become leaders of the future generation. There is a common fault with the students against which I must warn you. The students believe that no one can tell them anything which they do not already know. That mentality is harmful and often leads to quite a lot of mischief. But if you want to learn by your own experience, and not by the experience of your elders, let me tell you that as you become older, you will be more ready to learn from your costly experiences and the knock that you shall have received during your lifetime which will harm you more than anybody else.

Remember, you must have patience. Rome was not built in a day. Time factor, therefore, is essential. You must trust in your Government and I assure you that they are fully alive to the needs of the people, and particularly the masses who require special attention. Give them full chance and opportunity. The success of our achievements will depend upon our unity, discipline and faith not only in ourselves but in God who determines the destinies of people and nations.

My young friends!

You must now fully realize the vital change, the fundamental change that has taken place. You are not now merely to confine yourselves to becoming Government servants which was the avenue to which most of you aspired. You must now realize that fresh fields, new channels and avenues are now being thrown open to you where you have unlimited opportunities, namely, you must now direct your attention to science, commercial banking, insurance, industry and technical education.

I thank you again for the honor you have done me today.

EDUCATIONAL THOUGHTS OF ALLAMA MUHAMMAD IQBAL

Without education no nation could progress even survive in the world. But modern education produces only money-making machines. The moral values are getting eradicated. Social fabric is getting weakened. We are imparting theoretical knowledge based upon education. We have to make the children more aware on socialization. Even the information being given is very much non uniform in all the states. I think that life without education is a waste.

The University of Mianwali is committed to providing modern infrastructure and state-of-the-art facilities to enable the students to update their knowledge in various scientific disciplines by providing access to contemporary technology. At the same time, the University has been quite successful in maintaining a balance between modern trends in education and its old traditions. Furthermore, the University aims to inculcate critical thinking and enhance the intellectual grooming of the students which is essential for becoming proactive, productive, and responsible citizens. In addition, the beautiful campus has an exclusive administrative block and two academic blocks where the administrative and academic activities are being carried out independently. The academic blocks house state-of-the-art classrooms, well-equipped laboratories, the library, and faculty offices. A bachelor's hostel for faculty is already functioning. In order to meet the growing needs of the University, the work on infrastructure development is moving at a fast pace. Since its inception, the campus has made tremendous progress both in academic and co-curricular activities with the dedication and hard work of the faculty members. Currently, more than 20 undergraduate programs are being offered in various disciplines under the Faculty of Sciences and Faculty of Social Sciences & Humanities. We would not halt here and try to expand the sphere of academic activities by launching several new disciplines to respond to the new demands of society and the job market. The University intends to launch its M.Phil/PhD programs in selected disciplines in near future for which the preliminary work has already been completed. I am confident that in the coming years, we, as a team of highly dedicated professionals, will open new vistas and avenues in the field of higher education and research. CITY OF MIANWALI

Mianwali District was an agricultural region with forests during the Indus Valley Civilization followed by the Vedic Civilization. In 997 CE, Sultan Mahmud Ghaznavi took over the Ghaznavid dynasty empire established by his father, Sultan Sebuktegin. In 1005 he conquered the Shahis in Kabul, followed by the conquests of Punjab region. The population of the Punjab region became majority Muslim, following the conquests by various Muslim dynasties from Central Asia. Immediately preceding the annexation of the Punjab by the British after the Anglo-Sikh Wars, this area was part of the Sikh Empire. During British rule, the Indian empire was subdivided into provinces, divisions and districts; afterward, the independence of Pakistan divisions remained the third tier of government until 2000. The British had established the town of Mianwali as tehsil headquarters of Bannu District then part of Dera Ismail Khan Division of Punjab province.

Though Mianwali is claimed an integral part of the Saraiki speaking belt by the Saraiki language activists, Punjabi-Saraiki division seems to hold little influence on common people in this district. Inhabitants of Mianwali district speak a great variety of Saraiki. Besides Saraiki and Punjabi, Pashto and Urdu languages are also spoken or used for communications by the people of Mianwali.

District Mianwali is spread over an area of 5,840 square kilometers and is in vicinity of district Attock on North-East, Chakwal and Khushab districts on East and Bhakkar on South and Khyber Pakhtunkhwa on its West and North-West. River Indus flows across the district from North to South. Three branches of the Thal Canal Emerging from Jinnah Barrage on river Indus near Kalabagh irrigate the vast areas. Another canal called Chashma Link Canal connects river Indus with river Jhelum through Chashma Barrage. The district has extreme hot and cold climate. The maximum temperature during the summer shoots up to 51 C while the minimum temperature recorded in winter is as low as 2 C. The average rainfall in the district is about 250mm.

Namal Lake is located on side of the Namal valley in Mianwali District, Punjab, Pakistan. It was formed following the construction of Namal Dam in 1913. The lake has a surface area of 5.5 square km. There are mountains on its Western and Southern sides while the other two sides are the agricultural areas.

The Kala Bagh Dam is a proposed hydroelectric dam on the Indus River at Kala Bagh in the Mianwali District, Punjab, Pakistan. The issue has been intensely debated along ethnic and regional lines for over 40 years. If constructed, the dam could generate 3,600 MW of electricity. It is also suggested and promoted as a potential solution to the chronic flooding problems and the related water crises in the country. Over the decades, the understanding of the environmental impacts of mega dam projects have grown, and Pakistan Economy Watch has demanded a national debate on the KBD issue.

Biotechnology is the dynamic branch of biological sciences, which connect biology with the revolutionary technologies including machine learning, robotics, quantum mechanics, electrical engineering, and biosensing devices, materials designing, agriculture, industrial enzymology, genetic engineering, computational biology, digital health care and many more. Biotechnologists have captured the market nationally and internationally especially in the fields of Agriculture, industries, health sector and to overcome the environmental problems. Socially it has both benefits and risks, and the main theme is to use knowledge for the benefits of mankind and nature. e.g., researchers were able to track the 2014 Ebola epidemic and now COVID-19 pandemic in real-time using DNA sequencing. Pharmaceutical companies are designing new anti-cancer drugs targeted at people with a specific DNA mutation. Entire new fields, such as personalized medicine, owe their existence to DNA sequencing technology. There are job opportunities in the fields of academics(teaching), Research organizations, environmental projects, tissue culture and genetic engineering labs, production of new varieties both in plants and animals, production of vaccines, vitamins, hormones, drugs etc.

DEPARTMENT OF BOTANY

Dr. Amir Muhammad Khan

Incharge / Assistant Professor

✉ botany@umw.edu.pk

☎ 0459-920270, Ext. 134

Botany is a subject of prime importance since the evolution of land and atmosphere. Plants are of immense importance for the continuity of life. They are the source of food, shelter, clothing etc. In the changing global environmental prospectus and climate change the importance of vegetation has enhanced many folds to overcome the natural disasters and natural and anthropogenic issues facing the humanity like pollution, water shed management, soil erosion, food security, clean water etc. and global ecological issues. The Prime Minister of Pakistan vision is also the “clean and green” Pakistan which cannot be achieved without the plantation of vegetation and forests and the development of this sector.

Department of Botany was started in 2013 at sub-campus Mianwali University of Sargodha. Initially BS Botany program was started, and later M.Sc. classes were also introduced in 2015. Since then, the department is progressing day by day and hundreds of students have completed their degrees and are serving in Government and non-governmental organizations and are also excelling their career in higher degree programs at different Universities. The department also started research activities in 2017 and completed their research thesis at BS and M.Sc. level and also published and are publishing their research articles in HEC recognized journals.

The establishment of Department of Botany at Mianwali was the need of the hour as Mianwali is a district with diversified landscaping like the presence of mountains, deserts, plains, forests, meadows, and the Great Indus River and its encashment areas. These landscapes are occupied with different habitats having unique terrestrial and aquatic flora including phytoplankton which is still unexplored completely. This uniqueness of the area arises a need to further strengthen this Department and to start research in different areas of Botany. Since the area is rich in diversified flora so the research will help in the conservation of biodiversity of the area.

Zoology tries to understand and preserve the vast diversity existing on our planet. It is a major part of our scientific knowledge opening gateways to the medical science. Zoology is a science that has taken us back to our ancestors through break through studies on DNA (the molecule of life). It is a multidisciplinary field equipping its degree holders in environmental science, forensics, conservation and population genetics, microbiology, immunology toxicology, biochemistry, cell and molecular biology, wildlife, animal behavior, fisheries palaeontology, physiology and zoogeography. The Department of Zoology was established initially as part of biological sciences and later on gained independent status in 2014. The department has highly professional and qualified faculty having expertise in multiple disciplines of Zoology. Innovative projects of inter-disciplinary nature have been bagged by the faculty under ORIC research initiative. Degree programs like BS and MSc are successfully running at the department. Department of Zoology has richly contributed in success of University as our graduate are working both in public and private sectors and playing effective role in various fields.
